

Adaptive, Intelligent and Distributed Assurance Platform

Evolving RAID, a platform used by Mobileum for integral risk management in companies, to leverage edge computing and 5G, while ensuring privacy and confidentiality.

The Next Generation of the RAID Platform:

The next version of RAID will enable companies to collect and monitor data in an extremely flexible way, with real-time guarantees, security and reliability. The prototype will be deployed and demoed by the end of the project in a realistic scenario in the telecommunication services' sector.
